From Wisdom to Technology

Medhantra is not just a technology fest. It presents technology as a continuation of the human pursuit of knowledge. Indian Knowledge Systems give us examples of learning, mathematics, astronomy, logic, strategy, arts and structured thinking. Medhantra takes that spirit and connects it with modern coding, AI, cybersecurity, management, gaming, design and innovation.

The Sanskrit phrase marks the movement from *prajñā* (wisdom, intellectual understanding) towards *praudyogikī* (technology). The theme does not separate ancient knowledge from modern technology; it connects them.
